Subject: RE: OU7 follow-up item

Dante,

We have reviewed the list of items provided in your October 25 email. Many of these items will be addressed in the upcoming OU-7 CSM Update. Specifically, ARC Response to Comments (RTC) 3, 6, 7, and 9, fifth and sixth paragraphs relates to plots and distribution of organic carbon in the Drain. This item is addressed in the OU-7 CSM Update document.

We are still working on the statistical evaluation of background concentrations, we can provide an update on Wednesday's call, but the discussion likely may not be definitive by that time. Perhaps that discussion should be deferred until after the agency review of the OU-7 CSM update report?

The item relating to Comment/RTC 4, Figure 6-2 involves the number of Mo and Se detects in the background datasets. We have resolved this matter with APTIM.

Lastly, several of the items listed appear to be further comments from EPA and we did not have them on our "to-do" list. We will need to discuss how these further comments will be resolved.

Thanks,

-jack

Hi Jack and John,

Have you had a chance to look at the “analysis not yet presented” list that I re-sent you guys last week? I would like to have you guys see if your team can start providing that information, if it is not already in the CSM update. Of course we don’t want to slow down your CSM update, but can you look into it? Let me know what you think. Thanks!

Dante Rodriguez

Subject: FW: OU7 follow-up item

Jack and John,

On our monthly call last week we talked about the “analyses not yet presented” list that I had sent you guys a couple weeks ago (forwarded below). I am following up on that. Check it out and let’s make a plan for how to have you guys respond without slowing down the team’s CSM update. Thanks!

Subject: OU7 follow-up item

Jack and team,

Through the course of the Phase 1 data evaluation, comments and responses, EPA and Aptim kept track of places where responses cited evaluations that had not yet been presented. Provided herein is a list that Aptim prepared for me, identifying such items. EPA requests that you share these evaluations with the group for review at this time, while the topics are still fresh in our minds, rather than waiting until a complete RI report is submitted for our review. Since you had already conducted these analyses, it would be expedient for you to share them, and hopefully we can close those loops between now and December (when you will be submitting the agricultural evaluation for our review). Thank you!
